CalliPay is the technology leader. The open architecture and modular design of the *Unified Payment Portal* allows you to build your own solution and integrate seamlessly with your existing systems.

CalliPay continually enhances its payment services to insure you have the most powerful tools available today. Web access means that you perform all your payment, reporting and management tasks with the greatest flexibility and the lowest cost.

All data transacted through **CalliPay's payment network is secured and protected using the highest level of encryption** security available. From Login to Log off, all session activity is protected using 128-bit SSL encryption and tracked by our systems to avoid critical data exposure. User permission levels add another level of protection

by providing accountability.

The *Unified Payment Portal* lets you start with no up-front costs. No need to worry about volume commitments. You just pay for what you use.

The *CalliPay Unified Payment Portal* approach is simple. Perform ALL your payment related activities via one centralized site, with access to customized tools and solutions for your payment needs.

No limits. No matter the size or number of locations of your business, our systems are scalable to meet all your payment needs. The *Unified Payment Portal's* **centralized yet modular solution allows for true integration and limitless growth.**
